

GitHub

Guía rápida para usar github sin tener git instalado.

Para crear un nuevo repositorio

En su pagina principal de github haga clic en 'New'

The screenshot shows the GitHub homepage. At the top is a dark navigation bar with the GitHub logo, a search bar labeled "Search or jump to...", and links for "Pull requests", "Issues", "Marketplace", and "Explore". On the left sidebar, under "Recent Repositories", there is a search box "Find a repository..." and a list of repositories, including "OperationalResearch4/Markov_Models". Below this is the "Recent activity" section. The main content area features a large light blue and green banner for "Learn Git and GitHub without any code!" with buttons for "Read the guide" and "Start a project". To the right of the banner is a card titled "Our response to the war in Ukraine" with a "Read more" link. Below the banner, there are tabs for "Following" and "For you (Beta)". The "For you" tab is selected, showing a repository card for "OperationalResearch4/x" by "Nathylyn", which was forked from "OperationalResearch4/x" 5 days ago. The card includes the repository name, a description "ejemplo", the update date "Updated Apr 25", and a "Star" button.

Ahora, coloque un nombre de repositorio que no exista en su perfil, por ejemplo si ya tiene un repo llamado hola no puede crear uno nuevo con el mismo nombre. Puede colocar una descripción si lo desea y configurar si es un repositorio público o privado.

[Pull requests](#) [Issues](#) [Marketplace](#) [Explore](#)

  

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner *

Repository name *

 OperationalResearch4 ▾

/

Great repository names are short and memorable. Need inspiration? How about [jubilant-octo-guide?](#)

Description (optional)

☒  **Public**

Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more](#)

Ahora haga clic en *'Create repository'*. Con esto ya habrá creado su nuevo repo.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ **Add a README file**

This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: None ▼

Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

License: None ▼

 You are creating a public repository in your personal account.

Create repository

Luego, para cargar los archivos que tiene en su ordenador seleccione *'uploading an existing file'*

[Code](#) [Issues](#) [Pull requests](#) [Actions](#) [Projects](#) [Security](#) [Insights](#) [Settings](#)

Quick setup — if you've done this kind of thing before

Set up in Desktop

 or

HTTPS

SSH

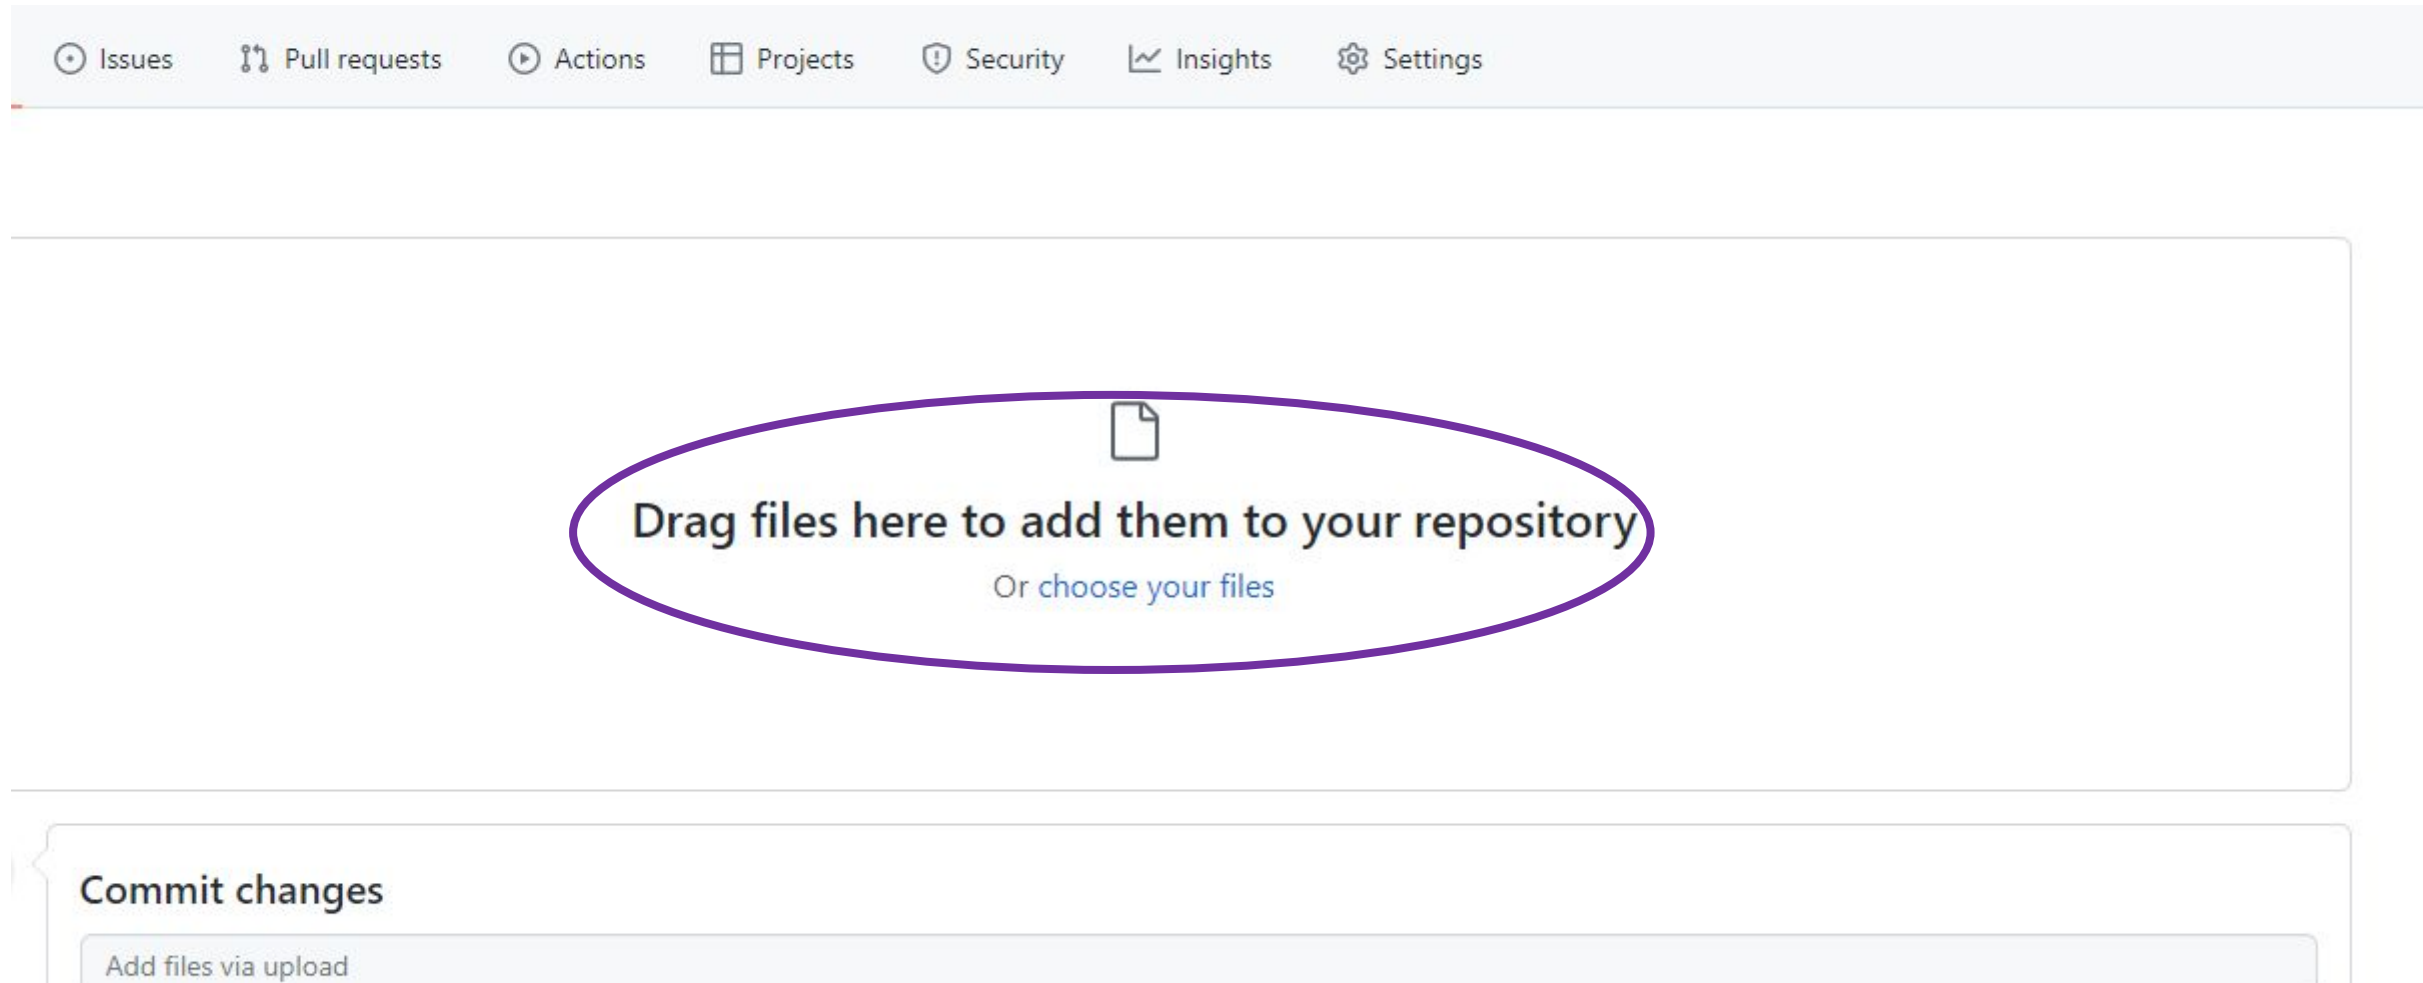

https://github.com/OperationalResearch4/x.git

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# x" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/OperationalResearch4/x.git
git push -u origin main
```

Ahora puede arrastrar archivos al repositorio o cargarlos desde su equipo

Luego de haber cargado los archivos haga clic en '*Commit changes*' para guardar los cambios

Cancel

Para invitar personas a colaborar en su proyecto:

En su repositorio, haga clic en esta secuencia: 'Settings' > 'Collaborators' > 'Add people'

The screenshot shows the GitHub repository settings page. The top navigation bar includes links for Code, Issues, Pull requests, Actions, Projects, Security, Insights, and Settings. The left sidebar lists various settings categories: General, Access, Collaborators (selected), Code and automation, Branches, Tags, Actions, Webhooks, Pages, Security, Code security and analysis, Deploy keys, and Secrets. The main content area is titled 'Who has access' and shows two tabs: 'PRIVATE REPOSITORY' and 'DIRECT ACCESS'. The 'PRIVATE REPOSITORY' tab is active, showing that only those with access to the repository can view it, with a 'Manage' link. The 'DIRECT ACCESS' tab shows that 0 collaborators have access to the repository. Below this, the 'Manage access' section displays a message: 'You haven't invited any collaborators yet' with an 'Add people' button.

Who has access

PRIVATE REPOSITORY

Only those with access to this repository can view it.

Manage

DIRECT ACCESS

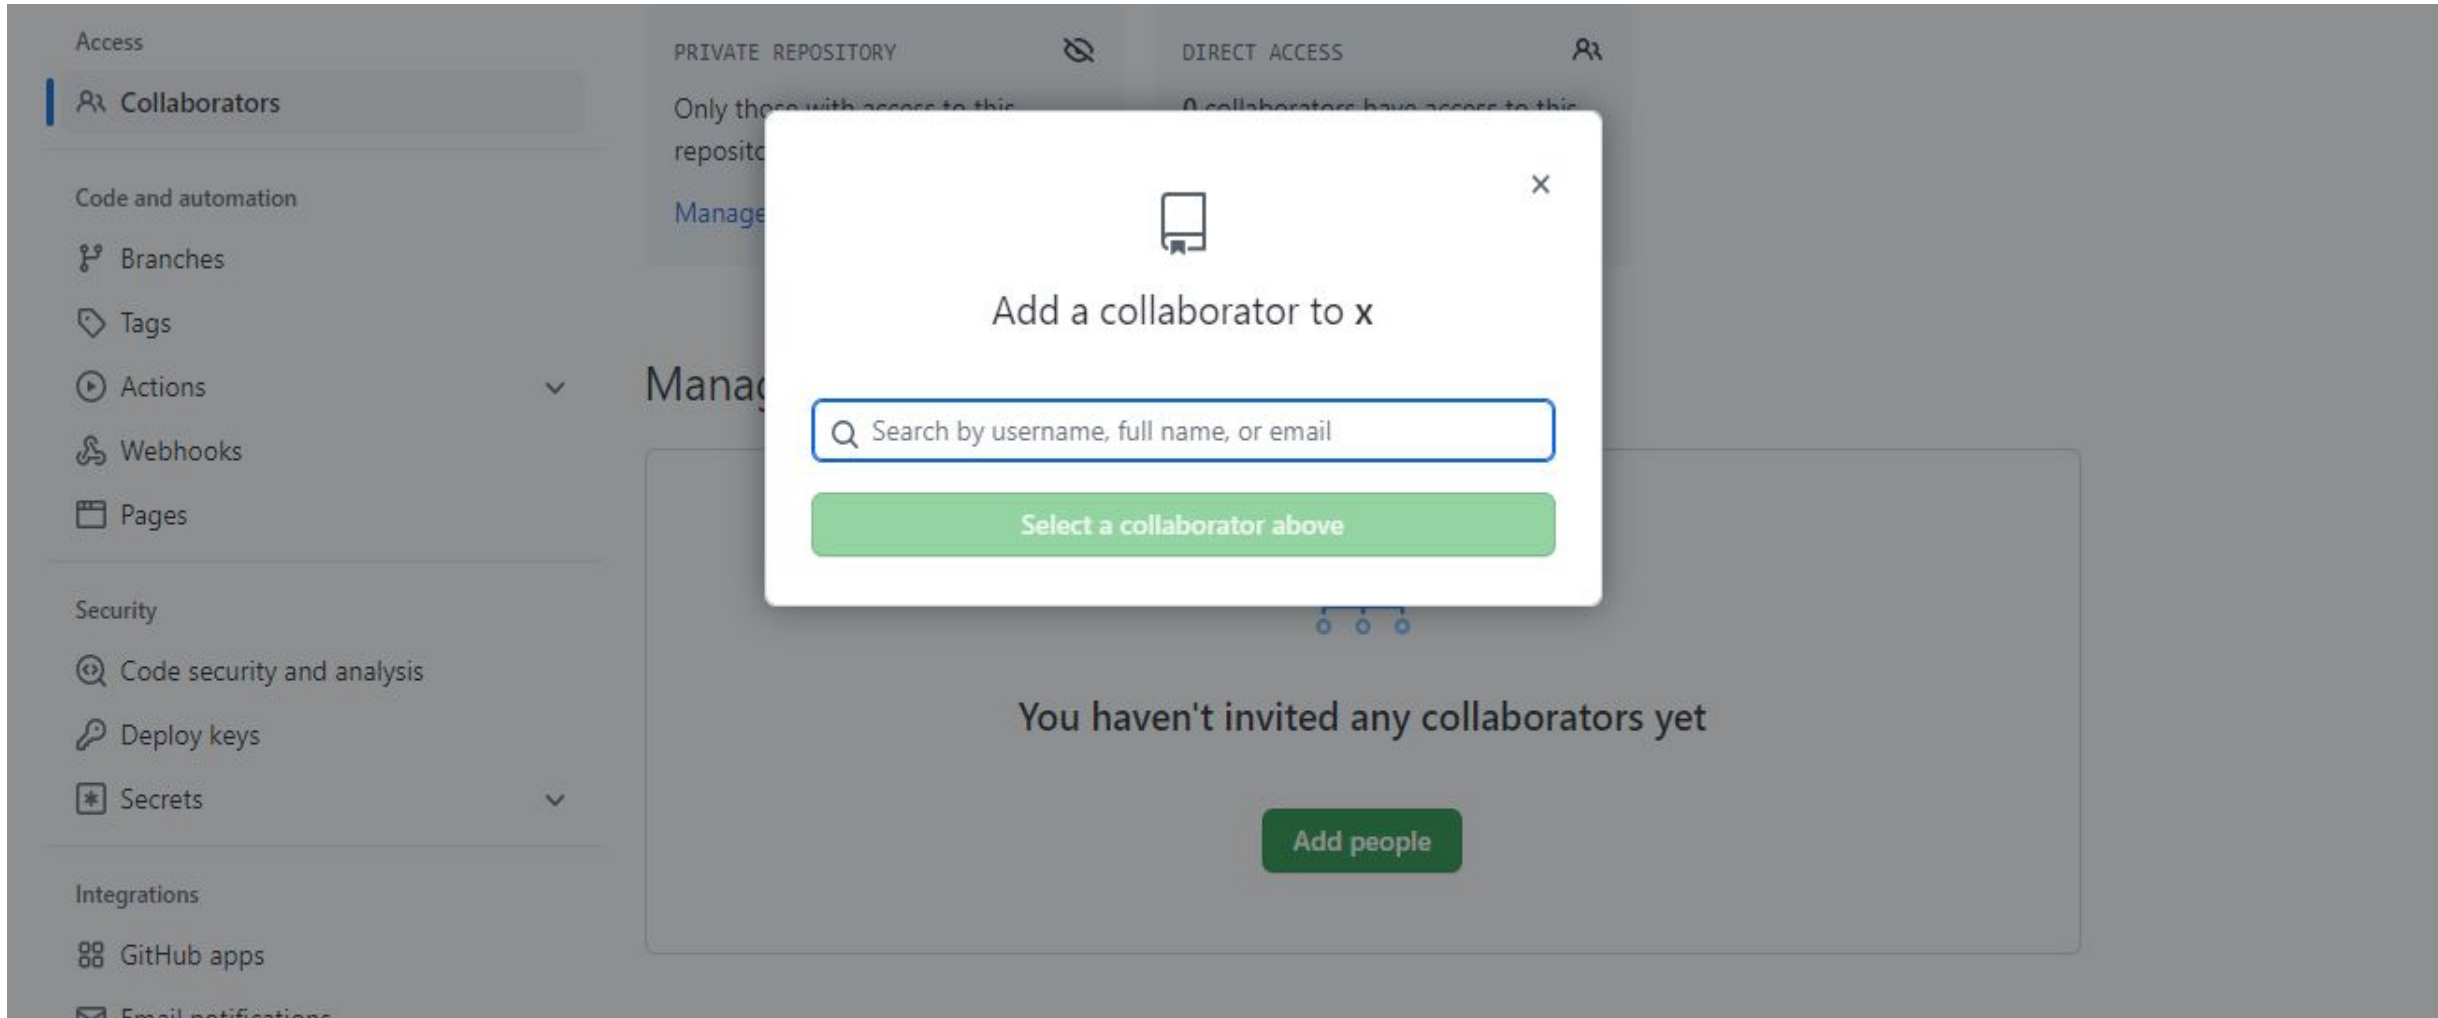

0 collaborators have access to this repository. Only you can contribute to this repository.

Manage access

You haven't invited any collaborators yet

Add people

Escriba el nombre de usuario de la persona que desea que colabore con ud. Esa persona recibirá una invitación en su correo electrónico que expirará en 7 días.

Para colaborar en un proyecto:

Luego de haber aceptado la invitación (o si es un proyecto público en que pueden trabajar), para comenzar a colaborar debe hacer clic en 'Fork'.

The screenshot shows the GitHub interface for a repository named 'OperationalResearch4 / x' which is marked as 'Private'. In the top right corner, there are three buttons: 'Watch 0', 'Fork 0' (which is circled in purple), and 'Star 0'. Below the repository name, there is a navigation bar with links for 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Security', and 'Insights'. The main content area shows a file named 'ima1.png' with an 'Add files via upload' button. To the right, there is a sidebar with sections for 'About' (no description), 'Releases' (no releases published), and 'Packages'. The 'Fork' button is highlighted with a purple circle.

Coloque una descripción si lo desea. Luego haga clic en ‘*Create fork*’. Esto generará una copia de ese repositorio en su github.

[Code](#) [Issues](#) [Pull requests](#) [Actions](#) [Projects](#) [Security](#) [Insights](#)

Create a new fork

A *fork* is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

Owner *

 OperationalResearch1 ▾

/ x ✓

By default, forks are named the same as their parent repository. You can customize the name to distinguish it further.

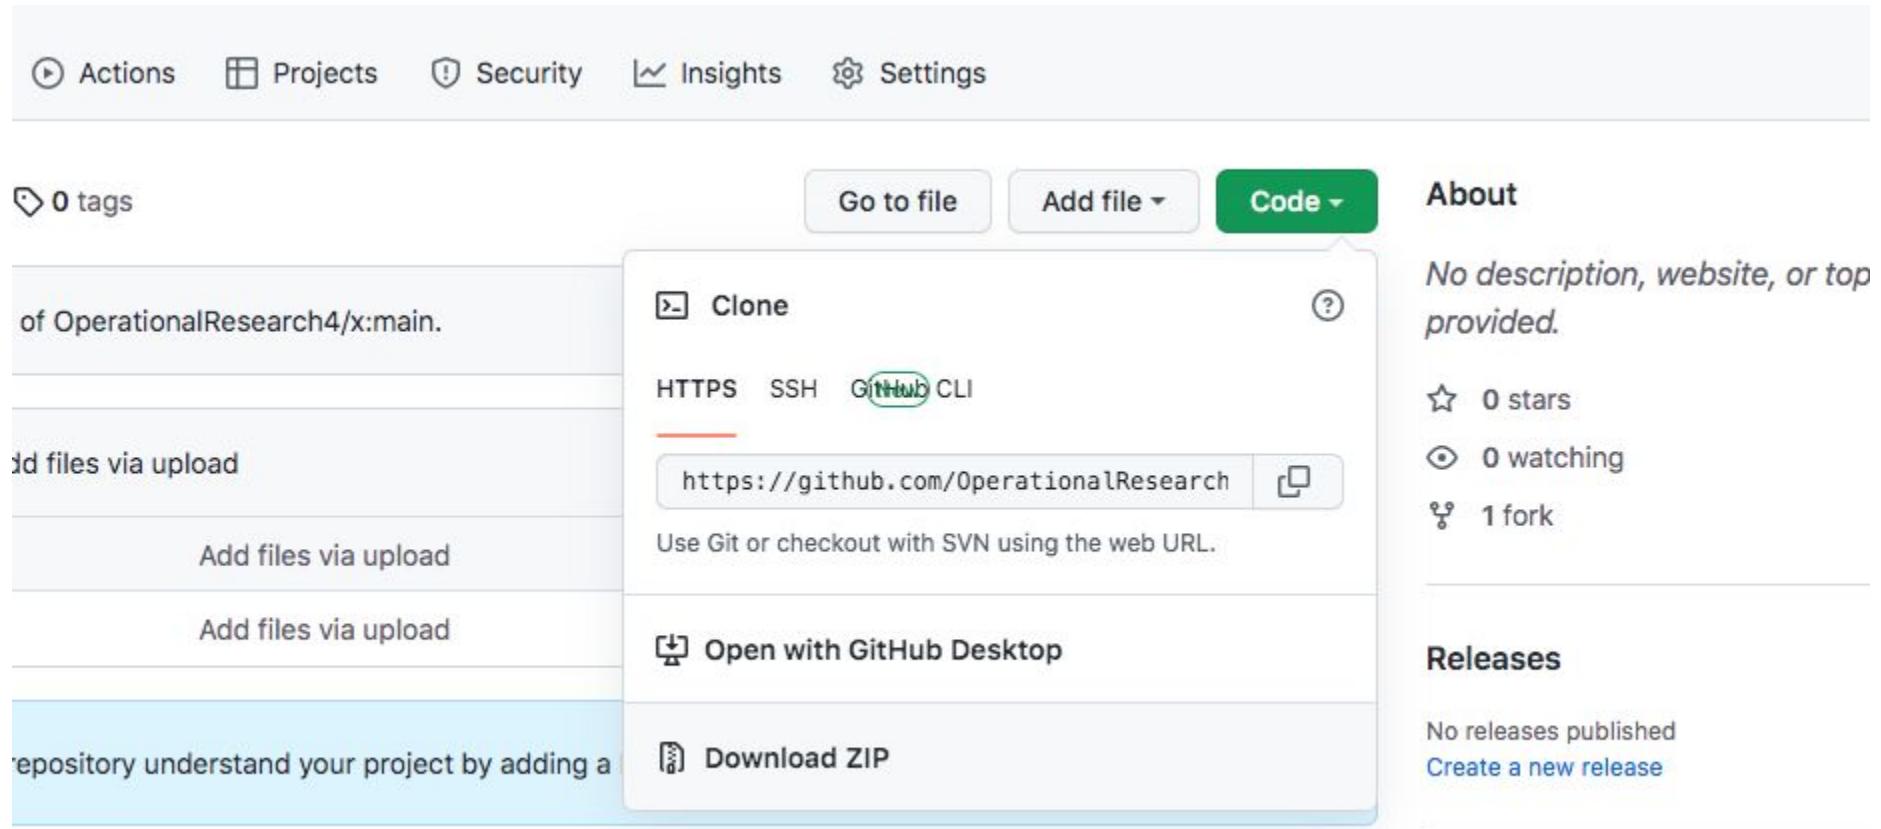

Description (optional)

i You are creating a fork in your personal account.

Create fork

Para descargar los archivos a su equipo:

Haga clic en 'Code', y luego de la lista desplegable seleccione 'Download ZIP'. Ya con esto ud. podrá manipular los archivos y elaborar los cambios que considere oportunos.

Puede cargar o crear archivos en el repositorio. Ya sean archivos nuevos o aportes en una colaboración, haga clic en *'Add file'*. Si va a cargar archivos desde su equipo seleccione la segunda opción.

The screenshot displays the GitHub interface for a repository named 'OperationalResearch4'. The top navigation bar includes links for Code, Pull requests, Actions, Projects, Security, Insights, and Settings. Below this, the repository's main section shows the 'main' branch with 1 branch and 0 tags. A message states 'This branch is up to date with OperationalResearch4/x:main.' The 'Add file' dropdown menu is open, showing two options: 'Create new file' and 'Upload files'. The 'Upload files' option is highlighted with a purple circle. Below the dropdown, a commit history entry is visible, showing a commit by 'OperationalResearch4' titled 'Add files via upload' with a commit hash of '8af638' and a timestamp of '1 hour ago'. The commit details show a file named 'ima1.png' being added via upload. At the bottom, a blue banner encourages adding a README, with a green 'Add a README' button.
